

nX Paint

INSTANT GRAPHICS & VIDEO DELIVERY TOOL

Live to air

Any graphic designer working in a 24x7 news environment will appreciate a system that has a low turnaround time to create, stack and deliver graphics. In Breaking News situations, there is considerable pressure to deliver high quality graphics within extremely thin timelines.

nX Paint makes this possible by integrating industry standard graphic packages like Photoshop® and After Effects® into our award winning delivery mechanism. This ensures a familiar platform for the designers to work on. An extremely easy to use interface ensures a quick search and delivery of graphics designed on Photoshop® and After Effects®.

Features

- Deliver 2 simultaneous videos at one time
- Playback Audio Clips
- Supports external keying
- Pause , resume & synchronize animations on-air.
- HD compliant
- Deliver multiple graphics & animations back to back.
- Supports all popular audio & video codecs.

- *Very easy-to-use*
- *On-the-fly graphics*
- *Cost-effective*
- *Common design tools*
- *Photoshop & After Effects for live broadcast production atmosphere*
- *Graphic Redundancy & Backup Solution*

High Quality Graphics at Low Cost

For any broadcast company, graphics delivery is a basic requirement. Companies spend thousands of dollars on purchase and support of expensive broadcast graphics creation and delivery systems, which provide their designers the tools to generate and deliver broadcast graphics. In addition, with each deployment, dedicated skilled professionals need to be hired to design on these systems.

nX Paint provides you with the tools to deliver the best-looking graphics created in the shortest amount of time and at really low costs. nX Paint sits on top of Adobe Photoshop® and Adobe After Effects®. These are industry leaders for stills and animations. With nX Paint, there is no need to learn a new graphic system. The designers are right at home with these familiar graphics suites. nX Paint also leverages standard Windows based PC software for providing functionalities like Spell Checker, source material, actions etc. Also, there are thousands of plugins available for Photoshop® and After Effects® which can be used for enhancing graphics and animations.
